Hydrocarbon Processing

1974 Annual Editorial Index

Volume 53

Index reprints can be obtained by writing the Reprint Dept.

HYDROCARBON PROCESSING, Box 2608, Houston, Tx 77001

ABSORPTION
How Amoco controls H_2S cleanup....Jan. 115
Design falling film absorbers....Jan. 131
Amisol process purifies gases....Apr. 78
HiPure process removes CO_2/H_2S....Apr. 81
New feeds for the HPI....May 91
Improve absorber prediction....June 136
Solve more distillation problems (Part 1) July 148
Refining Handbook....Sept. 103
Versatile process uses selective absorption....Oct. 131
Solve more distillation problems (Part 2)....Nov. 176
What lube oil processes to use....Dec. 59
Re-refining schemes compared....Dec. 74
ACETALDEHYDE see ALDEHYDES
ACID GASES
How Amoco controls H_2S cleanup....Jan. 115
Process for CO_2/char reaction....Feb. 95
Citrate process ideal for Claus tailgas cleanup....Apr. 75
Amisol process purifies gases....Apr. 78
HiPure process removes CO_2/H_2S....Apr. 81
Re-refining uses propane treat....Apr. 129
Impure feeds cause Claus plant problems. July 129
Refining Handbook....Sept. 103
Reclaim compressor seal oil....Oct. 115
Stack gas cleanup progress....Oct. 119
CBA process ups Claus recovery....Oct. 122
Burner/firebox design improves sulfur recovery....Oct. 125
Versatile process uses selective absorption....Oct. 131
Consider all Claus reactions....Nov. 171
Choose catalyst objectively....Nov. 181
ADDITIVES
Refiners face corrosion facts....Apr. 109
This additive system is automated....June 100
Refining Handbook....Sept. 103
Conductivity additives are best....Dec. 111
ALCOHOLS
Make phthalates direct....Apr. 117
Natural gas future: good....May 87
ALDEHYDES
Better route to isoprene....July 121
Acetic acid today....Nov. 103
ALKYLATION
NPRA's '73 panel views processes....Mar. 119
World model for optimum refining....June 101
Refining Handbook....Sept. 103
AMMONIA
Design falling film absorbers....Jan. 131
Conducting trade with China....Apr. 34-F
Make caprolactam via PMK....July 124
Impure feeds cause Claus plant problems. July 129
Make ammonia from coal....Oct. 133
Make pyridines direct....Nov. 129
Partial oxidation for syngas and fuel....Dec. 77
ANALYZING
Monitor boiler fuel density to control air/fuel ratio....Feb. 89
Analyzing heavy ends of crude (Part 2)..Apr. 93
Case histories of specialized turbomachinery problems....Apr. 141
Increase compressor reliability....May 117
Reduce process heater fuel....July 106
Analyzing heavy ends of crude (Part 3)..July 141
Answers to important questions about equipment maintenance....July 159
Analyzing heavy ends of crude (Part 4)..Aug. 93
Analyzing heavy ends of crude (Part 5)..Nov. 187
Monitor machinery condition for safe operation....Nov. 205
AROMATICS
Paccal makes ethylene from resid....Jan. 127
New phthalic anhydride process....Feb. 111
Make phthalates direct....Apr. 117
Petrochemicals—more for 1974....May 81
Europe's petrochemical outlook is hazy. June 34-H
Make caprolactam via PMK....July 124
Pure p-xylene by single stage....Aug. 81
Refining Handbook....Sept. 103
Olefins outlook....Nov. 121
More petrochemicals from crude....Nov. 157
BOILERS, see HEAT TRANSFER
BOXSCORE
Section 2....Feb., June, Oct.
BUTADIENE
Petrochemicals—more for 1974....May 81
Phillips' new butadiene process....June 133
U.S. olefins through 1980....July 104
Olefins outlook....Nov. 121
More petrochemicals from crude....Nov. 157
BUTENES
Phillips' new butadiene process....June 133
Better route to isoprene....July 121
Acetic acid today....Nov. 103
CAPROLACTAM
Make caprolactam via PMK....July 124
CARBOXYLIC ACIDS
Acetic acid today....Nov. 103
Adipic acid by single stage....Nov. 114
CATALYSTS
Experts discuss SNG manufacture....Jan. 151
New phthalic anhydride process....Feb. 111
NPRA's '73 panel views processes....Mar. 119
Make phthalates direct....Apr. 117
Help from project E-A-R-L....Apr. 119
Magnaforming units compared....June 111
Energy crisis impact on ethylene glycol trends....June 129
Phillips' new butadiene process....June 133
Better route to isoprene....July 121
Make caprolactam via PMK....July 124
Refining Handbook....Sept. 103
Acetic acid today....Nov. 103
Adipic acid by single stage....Nov. 114
Make pyridines direct....Nov. 129
Oxidize HCl for chlorine....Nov. 151
Choose catalyst objectively....Nov. 181
CATALYTIC CRACKING
Cat gasoline improved by isom....Jan. 141
An inside look at China's HPI....Apr. 105
Refining Handbook....Sept. 103
Cost to reduce gasoline sulfur....Oct. 105
Olefins outlook....Nov. 121
More petrochemicals from crude....Nov. 157
CATALYTIC REFORMING see REFORMING
CHLORINE
Recover chlorine from HCl....Nov. 147
Oxidize HCl from chlorine....Nov. 151
COAL
Process for SO_2/char reaction....Feb. 95
Prepare coal for gasification....Mar. 91
Promises clean-burning coal....*Apr. 15
Methanation of coal gas for SNG....Apr. 69
King Coal's rebirth....May 89
Costs growing for coal-based SNG plants....*Sept. 15
Coal liquefaction outlook described....*Oct. 19
Make ammonia from coal....Oct. 133
World energy resources 1974....Nov. 62-E
Chemical feedstocks from coal....Nov. 143
Partial oxidation for syngas and fuel..Dec. 77
COKING
How to handle delayed coke....Mar. 85
An inside look at China's HPI....Apr. 105
This additive system is automated....June 100
How various parameters affect ethylene cracker run lengths....July 115
Refining Handbook....Sept. 103
COMPRESSORS
Improve machinery maintenance....Jan. 85
Optimize your vibration analysis procedures....Jan. 89
How to improve compressor operation and maintenance....Jan. 93
Hot alignment too complicated?....Jan. 99
Why clean turbomachines onstream?....Jan. 102
A new approach to turbomachinery analysis....Jan. 105
Improve your machinery maintenance tool kits....Jan. 111
Are couplings the weak link in rotating machinery systems?....Feb. 97
Test compressor performance—in the shop....Apr. 133
Test compressor performance—in the field....Apr. 138
Case histories of specialized turbomachinery problems....Apr. 141
Outlook for rotating equipment....May 96
Increase compressor reliability....May 117
How to select materials for centrifugal compressors....June 115
Answers to important questions about equipment maintenance....July 159
Reclaim compressor seal oil....Oct. 115
All the facts about machinery alignment. Oct. 139
Monitor machinery condition for safe operation....Nov. 205
Why properly rated gears still fail....Dec. 95
COMPUTERS
Create by talking with a computer....Mar. 145
World model for optimum refining....June 101
Solve more distillation problems (Part 1). July 148
Solve more distillation problems (Part 2)....Nov. 176
CONDUCTIVITY
New charts for viscosity and conductivity data (Part 1)....Jan. 145
New charts for viscosity and conductivity data (Part 2)....Feb. 107
New charts for viscosity and conductivity data (Part 3)....Mar. 115
New charts for viscosity and conductivity data (Part 4)....Apr. 169
Conductivity additives are best....Dec. 111
CONSTRUCTION BOXSCORE
Section 2....Feb., June, Oct.
CORROSION
Refiners face corrosion facts....Apr. 109
Valve problems: causes and cures....June 97
How to select materials for centrifugal compressors....June 115
Watch for elevated dew points in SO_3-bearing stack gases....June 143
Reclaim compressor seal oil....Oct. 115
COSTS
Cat gasoline improved by isom....Jan. 141
Steam cracker quench coolers: their design and location....Feb. 83
Refiners caught in the middle....May 74
LPG supply/demand....May 85
King Coal's rebirth....May 89
New feeds for the HPI....May 91
Petrochemical marketing outlook....May 97
HPI financing in 1974....May 100
Air coolers in cold climates....May 149
How useful is technological forecasting?. May 157
Europe's petrochemical outlook is hazy....June 34-H
World model for optimum refining....June 101
Build and run plants to save energy....July 89
U.S. olefins through 1980....July 104
Methods for economic analysis (Part 1)..July 133
You can predict construction-labor productivity....July 167
Control the cost of new plants....July 183
Europe aims at monetary union....Aug. 34-F
Design ethylene furnaces (Part 3)....Aug. 99
Refining Handbook....Sept. 103
Methods for economic analysis (Part 2)....Sept. 227
Set productivity standards....Sept. 252
State of the art—smokeless flares....Oct. 99
Cost to reduce gasoline sulfur....Oct. 105
Make ammonia from coal....Oct. 133
Methods for economic analysis (Part 3)..Oct. 161
Acetic acid today....Nov. 103
Olefins outlook....Nov. 121
Recover maleic anhydride....Nov. 132
What proteins cost from oil....Nov. 139
More petrochemicals from crude....Nov. 157
When is a profit not a profit?....Nov. 217
How much have oil prices affected world inflation....Dec. 42-E
Re-refining schemes compared....Dec. 74
COUPLINGS
Are couplings the weak link in rotating machinery systems?....Feb. 97
Why properly rated gears still fail....Dec. 95
CRACKING/CHEMICAL
New cracking process yields more ethylene....*Jan. 17
Design ethylene furnaces (Part 1)....Jan. 121
Cat gasoline improved by isom....Jan. 141
How feedstocks affect ethylene....Feb. 73
Steam cracker quench coolers: their design and location....Feb. 83
How to handle delayed coke....Mar. 85
Design ethylene furnaces (Part 2)....Mar. 95
NPRA's '73 panel views processes....Mar. 119
An inside look at China's HPI....Apr. 105
Crack crude for olefins....May 109
World model for optimum refining....June 101
How various parameters affect ethylene cracker run lengths....July 115
Make caprolactam via PMK....July 124
Design ethylene furnaces (Part 3)....Aug. 99
Refining Handbook....Sept. 103
Cost to reduce gasoline sulfur....Oct. 105
Olefins outlook....Nov. 121
More petrochemicals from crude....Nov. 157

CRUDE OILS
Analyzing heavy ends of crude (Part 2)..Apr. 93
An inside look at China's HPI.....Apr. 105
Look for fast North Sea development..May 34-F
Refiners caught in the middle.....May 74
Crack crude for olefins.....May 109
World model for optimum refining.....June 101
Analyzing heavy ends of crude (Part 3)..July 141
Analyzing heavy ends of crude (Part 4)..Aug. 93
Our future depends on oil.....Sept. 70-E
Refining Handbook .....Sept. 103
World energy resources, 1974.....Nov. 62-E
More petrochemicals from crude.....Nov. 157
Analyzing heavy ends of crude (Part 5)..Nov. 187
CRYOGENICS see REFRIGERATION
CYCLOHEXANE
Adipic acid by single stage.....Nov. 114
CYCLONES
Help from project E-A-R-L.....Apr. 119
Answers to important questions about equipment maintenance .....July 159
DEASPHALTING
What lube oil processes to use.....Dec. 59
Refining Handbook .....Sept. 103
DECOKING
Decoke furnace tubes faster.....Apr. 151
DEHYDROGENATION
Phillips' new butadiene process.....June 133
Refining Handbook .....Sept. 103
DESULFURIZATION
How Amoco controls H_2S cleanup.....Jan. 115
Refiners face corrosion facts.....Apr. 109
Outlook for materials.....**May 93**
Impure feeds cause Claus plant problems..July 129
Refining Handbook .....Sept. 103
Cost to reduce gasolie sulfur.....Oct. 105
Consider all Claus reactions.....Nov. 171
Choose catalyst objectively.....Nov. 181
DEWAXING
An inside look at China's HPI.....**Apr. 105**
Refining Handbook .....Sept. 103
What lube oil processes to use.....Dec. 59
DISTILLATION
Oxyton plant uses LNG cold.....Apr. 83
World model for optimum refining.....June 101
Solve more distillation problems (Part 1) .....July 148
Refining Handbook .....Sept. 103
Solve more distillation problems (Part 2) .....Nov. 176
What lube oil processes to use.....Dec. 59
Re-refining schemes compared.....Dec. 74
DRYING
Rubber handling: crumb to bale.....Mar. 79
Crankcase oil cleaned for fuel.....May 129
Refining Handbook .....Sept. 103
ECONOMICS see COSTS
ELASTOMERS
Rubber handling: crumb to bale.....Mar. 79
Better route to isoprene.....July 121
ELECTRICAL EQUIPMENT
Improve electrical system safety and reliability .....June 146
Why properly rated gears still fail.....Dec. 95
EMISSION see ENVIRONMENT
EMPLOYES
Are there enough engineers?.....May 106
Training craftsmen overseas.....May 178
ENVIRONMENT
How Amoco controls H_2S cleanup.....Jan. 115
Monitor boiler fuel density to control air/fuel ratio .....Feb. 89
Process for SO_2/char reaction.....Feb. 95
How to handle delayed coke.....Mar. 85
NPRA's '73 panel views processes.....Mar. 119
Promises clean-burning coal.....*Apr. 15
Citrate process ideal for Claus tailgas cleanup .....Apr. 75
Refiners face corrosion facts.....Apr. 109
Re-refining uses propane treat.....Apr. 129
Decoke furnace tubes faster.....Apr. 151
Crankcase oil cleaned for fuel.....May 129
Get syngas from seawater, lime.....*July 15
Exhaust controls use energy.....July 94
Impure feeds cause Claus plant problems .....July 129
Refinery's waste is paper's gain.....*Sept. 17
Refining Handbook .....Sept. 103
Estimate diffusivity quickly.....Sept. 224
Coal liquefaction outlook described....*Oct. 19
Can industrial profits and earth's ecology coexist .....Oct. 60-F
Environmental planning starts with process development.....Oct. 95
State of the art—smokeless flares.....Oct. 99
Cost to reduce gasoline sulfur.....Oct. 105
Reclaim compressor seal oil.....Oct. 115
Stack gas cleanup progress.....Oct. 119
Versatile process uses selective absorption .....Oct. 131
Re-refining schemes compared.....Dec. 74
ESTERS
Make phthalates direct.....Apr. 117
Product specs for liquid lubes.....Dec. 67
ETHERS
Product specs for liquid lubes.....Dec. 67
ETHYLENE
New cracking process yields more ethylene .....*Jan. 17
Design ethylene furnaces (Part 1).....Jan. 121
New charts for viscosity and conductivity data (Part 1).....Jan. 145
How feedstocks affect ethylene.....Feb. 73
New charts for viscosity and conductivity data (Part 2).....Feb. 107
How DSM makes HD-polyethylene.....Feb. 115
Design ethylene furnaces (Part 2).....Mar. 95
Crack crude for olefins.....May 109
Energy crisis impact on . . . ethylene glycol trends .....June 129
U.S. olefins through 1980.....July 104
How various parameters affect ethylene cracking run lengths.....July 115
Design ethylene furnaces (Part 3).....Aug. 99
Acetic acid today.....Nov. 103
Olefins outlook .....Nov. 121
Make pyridines direct.....Nov. 129
Shipping liquid ethylene.....Nov. 135
More petrochemicals from crude.....Nov. 157
EXCHANGERS see HEAT TRANSFER
EXTRACTION see ABSORPTION
FERMENTATION
What proteins cost from oil.....Nov. 139
FILTRATION
Pure p-xylene by single stage.....Aug. 81
Refining Handbook.....Sept. 103
FIRES see SAFETY
FLARES
Answers to important questions about equipment maintenance .....July 159
State of the art—smokeless flares.....Oct. 99
FOAM
Use foam to disperse LNG vapors?.....Feb. 119
This additive system is automated.....June 100
FORECASTING
Refiners caught in the middle.....May 74
Petrochemicals—more for 1974.....May 81
LPG supply/demand.....May 85
Natural gas future: good.....May 87
King Coal's rebirth.....May 89
New feeds for the HPI.....May 91
Petrochemical marketing outlook.....May 97
Are there enough engineers?.....May 106
How useful is technological forecasting..May 157
World model for optimum refining.....June 101
U.S. olefins through 1980.....July 104
You can predict construction-labor productivity .....July 167
Olefins outlook .....Nov. 121
FOUNDATIONS
Better pump grouting.....Feb. 101
A new approach to . . . tank foundation design .....Oct. 153
All the facts about machinery alignment..Oct. 139
FURNACES see HEAT TRANSFER
GASIFICATION
King Coal's rebirth.....May 89
Total energy by gasification.....Aug. 85
Costs growing for coal-based SNG plants .....*Sept. 15
Make ammonia from coal .....Oct. 133
Chemical feedstocks from coal .....Nov. 143
GEARS
Hot alignment too complicated?.....Jan. 99
Outlook for rotating equipment.....May 96
Why properly rated gears still fail.....Dec. 95
GLYCOLS
Energy crisis impact on . . . ethylene glycol trends.....June 129
Product specs for liquid lubes.....Dec. 67
GREASE see LUBRICANTS
HEALTH see SAFETY
HEAT EXCHANGERS see HEAT TRANSFER
HEAT TRANSFER
Design ethylene furnaces (Part 1).....Jan. 121
Steam cracker quench coolers: their design and location.....Feb. 83
Monitor boiler fuel density to control air/fuel ratio.....Feb. 89
Design ethylene furnaces (Part 2).....Mar. 95
New charts for . . . viscosity and conductivity data (Part 3).....Mar. 115
Refiners face corrosion facts.....Apr. 109
Decoke furnace tubes faster.....Apr. 151
New charts for . . . viscosity and conductivity data (Part 4).....Apr. 169
How to expand fired heater tubes.....May 123
Air coolers in cold climates (Part 1)....May 147
Air coolers in cold climates (Part 2)....May 149
Reduce process heater fuel.....July 106
Answers to important questions about equipment maintenance .....July 159
Design ethylene furnaces (Part 3).....Aug. 99
Burner/firebox design improves sulfur recovery.....Oct. 125
How to locate impingement plates in tubular heat exchangers.....Oct. 147
HYDROCRACKING
Refining Handbook .....Sept. 103
More petrochemicals from crude.....Nov. 157
HYDROGEN
NPRA's '73 panel views processes.....Mar. 119
Refining Handbook .....Sept. 103
Chemical feedstocks from coal.....Nov. 143
Partial oxidation for syngas and fuel..Dec. 77
HYDROGENATION
Shale gasification under study.....Apr. 89
Phillips new butadine process.....June 133
Make caprolactam via PMK.....July 124
Refining Handbook .....Sept. 103
HYDROTREATING
NPRA's '73 panel views processes.....Mar. 119
Refining Handbook .....Sept. 103
What lube oil processes to use.....Dec. 59
Re-refining schemes compared.....Dec. 74
INSTRUMENTATION
Improve machinery maintenance.....Jan. 85
Optimize your vibration analysis procedures .....Jan. 89
Why clean turbomachines onstream?....Jan. 102
A new approach to turbomachinery analysis .....Jan. 105
How Amoco controls H_2S cleanup.....Jan. 115
Monitor boiler fuel density to control air/fuel ratio .....Feb. 89
Improve solids handling instrumentation systems .....Mar. 87
How to control pump vibration.....Mar. 107
Test compressor performance—in the shop .....Apr. 133
Test compressor performance—in the field .....Apr. 138
Case histories of specialized turbomachinery problems .....Apr. 141
This additive system is automated.....June 100
Reduce process heater fuel.....July 106
Monitor machinery condition for safe operation .....Nov. 205
INSULATIONS see HEAT TRANSFER
INVENTORIES
Refiners caught in the middle.....May 74
World model for optimum refining.....June 101
Conserve energy resources.....July 87
ISOMERIZATION
Cat gasoline improved by isom.....Jan. 141
World model for optimum refining.....June 101
Refining Handbook .....Sept. 103
KETONES
Acetic acid today.....Nov. 103
LEGISLATION
Conducting trade with China.....Apr. 34-F
U.S. refining growth, 1951-1973.....May 77
Where is politics taking us?.....May 102
Europe's petrochemical outlook is hazy..June 34-H
Exhaust controls use energy.....July 94
LIQUEFACTION
Shale gasification under study.....Apr. 89
King Coal's rebirth.....May 89
Coal liquefaction outlook described....*Oct. 19
LIQUEFIED NATURAL GAS (LNG)
Oxyton plant uses LNG cold.....Apr. 83
Natural gas future: good.....May 87
Predict LNG fire radiation.....May 141
Use the cold in LNG.....Nov. 97
LIQUEFIED PETROLEUM GAS (LPG)
LPG supply/demand .....May 85
Natural gas future: good.....May 87
Use expander cycles for LPG recovery..Dec. 89
LUBRICANTS
Re-refining uses propane treat.....Apr. 129
Improve bearing life with oil mist lubrication .....May 113
Crankcase oil cleaned for fuel.....May 129
Refining Handbook .....Sept. 103
What lube oil processes to use.....Dec. 59
Product specs for liquid lubes.....Dec. 67
Re-refining schemes compared.....Dec. 74
MAINTENANCE
Improve machinery maintenance.....Jan. 85
How to improve compressor operation and maintenance .....Jan. 93
Hot alignment too complicated?.....Jan. 99
Predict failures and overhaul interval to minimize downtime.....Jan. 108
Improve your machinery maintenance tool kits .....Jan. 111
Experts discuss SNG manufacture.....Jan. 151
Are couplings the weak link in rotating machinery systems?.....Feb. 97
Better pump grouting.....Feb. 101
Decoke furnace tubes faster.....Apr. 151
Job enrichment at Union Carbide.....Apr. 196
How to expand fired heater tubes.....May 123
Training craftsmen overseas.....May 178
MALEIC ANHYDRIDE
Recover maleic anhydride.....Nov. 132
MANAGEMENT
A union view of HPI safety.....Jan. 159
Training in a small refinery.....Jan. 175
Can you spot a potential manager?.....Jan. 187
Development is more than training.....Feb. 123
Appraise employe performance objectively .....Mar. 133
Create by talking with a computer.....Mar. 145
To grow, apply your imagination.....Apr. 175
What really motivates people?.....Apr. 183
Job enrichment at Union Carbide.....Apr. 196
Petrochemical marketing outlook.....May 97
Are there enough engineers?.....May 106
Help the new employe to achieve.....May 170
What is a good project manager?.....May 172
Build a good communication system.....June 153
Guide to staffing new plants.....June 161
When a manager meets the press.....June 168
Conserve energy resources.....July 87
Build and run plants to save energy.....July 89
Methods for economic analysis (Part 1)..July 133
You can predict construction-labor productivity .....July 167
What the HPI can expect from OSHA...July 190
These programs develop people.....Aug. 53
Train with a "functional" approach....Aug. 58
Build a multicompany co-op.....Aug. 62
Technicians can relieve engineer shortages .....Aug. 65
Environmental planning starts with process development .....Oct. 95
Versatile process uses selective absorption .....Oct. 131
Methods for economic analysis (Part 2)..Sept. 227
Refiners' most-needed know-how.....Sept. 235
Have you learned to delegate?.....Sept. 243
Set productivity standards.....Sept. 252
Methods for economic analysis (Part 3) .....Oct. 161

The HPI needs a constituency ..... Oct. 165
Streamline vendor-data control ..... Oct. 169
Going metric (Part 1) ..... Oct. 181
Let's work with government ..... Nov. 223
Be prepared to go metric ..... Nov. 232
How much have oil prices affected world inflation ..... **Dec. 42-E**
China's management practices: a first-hand view ..... **Dec. 101**

MATERIALS HANDLING
Design and select . . . pneumatic conveying systems ..... Mar. 75
Rubber handling: crumb to bale ..... Mar. 79
Improve solids handling instrumentation systems ..... Mar. 87
Prepare coal for gasification ..... Mar. 91
Shipping liquid ethylene ..... Nov. 135
Conductivity additives are best ..... **Dec. 111**

METALS
Design ethylene furnaces (Part 2) ..... Mar. 95
Hardenability: key to vessel plate strength ..... Apr. 157
Outlook for materials ..... May 93
How to select materials for centrifugal compressors ..... June 115
Design ethylene furnaces (Part 3) ..... Aug. 99

MOTORS
Outlook for rotating equipment ..... May 96
Improve bearing life with oil mist lubrication ..... May 113
Improve electrical system safety and reliability ..... June 146
Answers to important questions about equipment maintenance ..... July 159
How to improve your motor specs ..... Nov. 211
Why properly rated gears still fail ..... **Dec. 95**

NATURAL GASES
Experts discuss SNG manufacture ..... Jan. 151
Amisol process purifies gases ..... Apr. 78
HiPure process removes CO_2/H_2S ..... Apr. 81
Natural gas future: good ..... May 87
World model for optimum refining ..... June 101
Improve absorber prediction ..... June 136
Get syngas from seawater, lime ..... *July 15
Build and run plants to save energy ..... July 89
Expander plant successful ..... Aug. 89
BWR applied to NG/SNG needs ..... Nov. 197
Use expander cycles for LPG recovery ..... **Dec. 89**

NITROGEN
Oxyton plant uses LNG cold ..... Apr. 83
Use the cold in LNG ..... Nov. 97
Oxidize HCl for chlorine ..... Nov. 151

NITROSATION
Make caprolactam via PMK ..... July 124

OLEFINS
New cracking process yields more ethylene ..... *Jan. 17
Design ethylene furnaces (Part 1) ..... Jan. 121
Paccal makes ethylene from resid ..... Jan. 127
New charts for viscosity and conductivity data (Part 1) ..... Jan. 145
How feedstocks affect ethylene ..... Feb. 73
New charts for viscosity and conductivity data (Part 2) ..... Feb. 107
How DSM makes HD-polyethylene ..... Feb. 115
Improve solids handling instrumentation systems ..... Mar. 87
Design ethylene furnaces (Part 2) ..... Mar. 95
New charts for viscosity and conductivity data (Part 3) ..... Mar. 115
Petrochemicals—more for 1974 ..... May 81
Conducting trade with China ..... **Apr. 34-F**
Crack crude for olefins ..... May 109
Energy crisis impact on . . . ethylene glycol trends ..... June 129
Phillips' new butadiene process ..... June 133
U.S. olefins through 1980 ..... July 104
How various parameters affect ethylene cracker run lengths ..... July 115
Better route to isoprene ..... July 121
Design ethylene furnaces (Part 3) ..... Aug. 99
Refining Handbook ..... Sept. 103
Olefins outlook ..... Nov. 121
Make pyridines direct ..... Nov. 129
Shipping liquid ethylene ..... Nov. 135
Chemical feedstocks from coal ..... Nov. 143
More petrochemicals from crude ..... Nov. 157

OXIDATION
New phthalic anhydride process ..... Feb. 111
Make phthalates direct ..... Apr. 117
Energy crisis impact on . . . ethylene glycol trends ..... June 129
Make caprolactam via PMK ..... July 124
Phillips' new butadiene process ..... June 133
Acetic acid today ..... Nov. 103
Adipic acid by single stage ..... Nov. 114
Oxidize HCl for chlorine ..... Nov. 151
Product specs for liquid lubes ..... Dec. 67

OXYGEN
Oxyton plant uses LNG cold ..... Apr. 83
Phillips' new butadiene process ..... June 133
Make caprolactam via PMK ..... July 124
Use the cold in LNG ..... Nov. 97
Acetic acid today ..... Nov. 103
Oxidize HCl for chlorine ..... Nov. 151
Partial oxidation for syngas and fuel ..... **Dec. 77**

PACKING see **SEALS**

PARTIAL OXIDATION
Make ammonia from coal ..... Oct. 133
Acetic acid today ..... Nov. 103
Partial oxidation for syngas and fuel ..... Dec. 77

PHTHALIC ANHYDRIDE
New phthalic anyhdride process ..... Feb. 111

PIPING
Optimize your vibration analysis procedures ..... Jan. 89
How to improve compressor operation and maintenance ..... Jan. 93
Revised piping code highlights ..... Mar. 101
How to control pump vibration ..... Mar. 107
Refiners face corrosion facts ..... Apr. 109
Decoke furnace tubes faster ..... Apr. 151
Outlook for materials ..... May 93
Improve bearing life with oil mist lubrication ..... May 113
Valves for the HPI ..... June 87
Why the swing to wafer-type check valves? ..... June 93
Valve problems: causes and cures ..... June 97
How to determine allowable steam turbine piping loads ..... Aug. 75
Conductivity additives are best ..... **Dec. 111**

POLITICS
Where is politics taking us? ..... May 102
Let's work with government ..... Nov. 223

POLLUTION see **ENVIRONMENT**

POLYOLEFINS
How DSM makes HD-polyethylene ..... Feb. 115
Design and select . . . pneumatic conveying systems ..... Mar. 75
Rubber handling: crumb to bale ..... Mar. 79
Improve solids handling instrumentation systems ..... Mar. 87
Petrochemicals—more for 1974 ..... May 81

PRESSURE VESSELS see **VESSELS**

PROPYLENE
New charts for viscosity and conductivity data (Part 2) ..... Feb. 107
New charts for viscosity and conductivity data (Part 3) ..... Mar. 115
Petrochemicals—more for 1974 ..... May 81
U.S. olefins through 1980 ..... July 104
Acetic acid today ..... Nov. 103
Olefins outlook ..... Nov. 121
More petrochemicals from crude ..... Nov. 157

PROTEINS
What proteins cost from oil ..... Nov. 139

PUMPS
Optimize your vibration analysis procedures ..... Jan. 89
Why clean turbomachines onstream? ..... Jan. 102
Improve your machinery maintenance tool kits ..... Jan. 111
Better pump grouting ..... Feb. 101
How to control pump vibration ..... Mar. 107
How to improve pump performance ..... Apr. 165
Outlook for rotating equipment ..... May 96
Improve bearing life with oil mist lubrication ..... May 113
Answers to important questions about equipment maintenance ..... July 159
All the facts about machinery alignment ..... Oct. 139

PYRIDINES
Make pyridines direct ..... Nov. 129

REACTORS
Answers to important questions about equipment maintenance ..... July 159
How to determine the geometry of pressure vessel heads ..... Aug. 71
Estimate diffusivity quickly ..... Sept. 224

REFORMING
Cat gasoline improved by isom ..... Jan. 141
NPRA's '73 panel views processes ..... Mar. 119
An inside look at China's HPI ..... Apr. 105
World model for optimum refining ..... June 101
Magnaforming units compared ..... June 111
Refining Handbook ..... Sept. 103
Make ammonia from coal ..... Oct. 133
More petrochemicals from crude ..... Nov. 157

REFRIGERATION
Oxyton plant uses LNG cold ..... Apr. 83
Pure p-xylene by single stage ..... Aug. 81
Expander plant successful ..... Aug. 89
Refining Handbook ..... Sept. 103
Use the cold in LNG ..... Nov. 97
Use expander cycles for LPG recovery ..... **Dec. 89**

RESIDUES
Paccal makes ethylene from resid ..... Jan. 127
Analyzing heavy ends of crude (Part 2) ..... Apr. 93
Analyzing heavy ends of crude (Part 3) ..... July 141
Total energy by gasification ..... Aug. 85
Analyzing heavy ends of crude (Part 4) ..... Aug. 93
Refining Handbook ..... Sept. 103
Analyzing heavy ends of crude (Part 5) ..... Nov. 187

SAFETY
A union view of HPI safety ..... Jan. 159
Use foam to disperse LNG vapors? ..... Feb. 119
NPRA's '73 panel views processes ..... Mar. 119
What's new in fire and safety training? ..... Mar. 163
Predict LNG fire radiation ..... May 141
API/NFPA report on HPI fire losses ..... May 182
Improve electrical system safety and reliability ..... June 146
What the HPI can expect from OSHA ..... July 190
You can have safer construction ..... Aug. 106
Test for intrinsic safety ..... Oct. 198
Conductivity additives are best ..... **Dec. 111**

SCHEDULING
What is a good project manager? ..... May 172
Control the cost of new plants ..... July 183

SEALS
Improve machinery maintenance ..... Jan. 85
How to improve compressor operation and maintenance ..... Jan. 93
Valve problems: causes and cures ..... June 97
Reclaim compressor seal oil ..... Oct. 115

SHALE OILS
Shale gasification under study ..... Apr. 89
New feeds for the HPI ..... May 91
Environmental planning starts with process development ..... Oct. 95
World energy resources, 1974 ..... Nov. 62-E

SITES
Refiners caught in the middle ..... May 74
U.S. refining growth, 1951-1973 ..... May 77
World model for optimum refining ..... June 101

SOLIDS HANDLING see **MATERIALS HANDLING**

SOLVENT REFINING
King Coal's rebirth ..... May 89
Refining Handbook ..... Sept. 103

SPILL
Use foam to disperse LNG vapors? ..... Feb. 119

STACKS
Watch for elevated dew points in SO_3-bearing stack gases ..... June 143
Stack gas cleanup progress ..... Oct. 119

STANDARDS
Revised piping code highlights ..... Mar. 101
Test compressor performance—in the shop ..... Apr. 133
Test compressor performance—in the field ..... Apr. 138

SUBSTITUTE NATURAL GAS (SNG)
Experts discuss SNG manufacture ..... Jan. 151
Process for SO_2/char reaction ..... Feb. 95
Prepare coal for gasification ..... Mar. 91
Methanation of coal gas for SNG ..... Apr. 69
SNG future tied to heavy feeds ..... Apr. 85
Shale gasification under study ..... Apr. 89
Get syngas from seawater, lime ..... *July 15
Costs growing for coal-based SNG plants ..... *Sept. 15
BWR applied to NG/SNG needs ..... Nov. 197

SULFUR
Process for SO_2/char reaction ..... Feb. 95
How to handle delayed coke ..... Mar. 85
NPRA's '73 panel views processes ..... Mar. 119
Promises clean-burning coal ..... *Apr. 15
Citrate process ideal for Claus tailgas cleanup ..... Apr. 75
Impure feeds cause Claus plant problems ..... July 129
Total energy by gasification ..... Aug. 85
Coal liquefaction outlook described ..... *Oct. 19
Cost to reduce gasoline sulfur ..... Oct. 105
CBA process ups Claus recovery ..... Oct. 122
Burner/firebox design improves sulfur recovery ..... Oct. 125
Versatile process uses selective absorption ..... **Oct. 131**
Consider all Claus reactions ..... Nov. 171
Choose catalyst objectively ..... Nov. 181

SYNCRUDE
New feeds for the HPI ..... May 91

TANKS see **VESSELS**

TAR SANDS
New feeds for the HPI ..... May 91
World energy resources, 1974 ..... Nov. 62-E

THERMODYNAMICS
Predict enthalpy more accurately ..... May 133
Improve absorber prediction ..... June 136
Solve more distillation problems (Part 1) ..... July 148
Estimate diffusivity quickly ..... Sept. 224
Reclaim compressor seal oil ..... Oct. 115
Predict three-phase equilibria ..... Nov. 167
Solve more distillation problems (Part 2) ..... Nov. 176
BWR applied to NG/SNG needs ..... Nov. 197

TOOLS
Improve your machinery maintenance tool kits ..... Jan. 111
All the facts about machinery alignment ..... Oct. 139

TRAINING
Training in a small refinery ..... Jan. 175
Can you spot a potential manager? ..... Jan. 187
Development is more than training ..... Feb. 123
How Getty Oil packaged its operator training ..... Feb. 131
Create by talking with a computer ..... Mar. 145
What's new in fire and safety training? ..... Mar. 163
To grow, apply your imagination ..... Apr. 175
Are there enough engineers? ..... May 106
Help the new employe to achieve ..... May 170
Training craftsmen overseas ..... May 178
Build a good communication system ..... June 153
Guide to staffing new plants ..... June 161
These programs develop people ..... Aug. 53
Train with a "functional" approach ..... Aug. 58
Build a multicompany co-op ..... Aug. 62
Technicians can relieve engineer shortages ..... Aug. 65
Refiners' most-needed know-how ..... Sept. 235
Going metric (Part 1) ..... Oct. 181
Be prepared to go metric ..... Nov. 232

TREATING
How Amoco controls H_2S cleanup ..... Jan. 115
NPRA's '73 panel views processes ..... Mar. 119
Amisol process purifies gases ..... Apr. 78
An inside look at China's HPI ..... Apr. 105
Refiners face corrosion facts ..... Apr. 109
Re-refining uses propane treat ..... Apr. 129
Outlook for materials ..... May 93
World model for optimum refining ..... June 101
Total energy by gasification ..... Aug. 85
Refining Handbook ..... Sept. 103
Cost to reduce gasoline sulfur ..... Oct. 105
CBA process ups Claus recovery ..... Oct. 122
Burner/firebox design improves sulfur recovery ..... Oct. 125
Versatile process uses selective absorption ..... Oct. 131
Consider all Claus reactions ..... Nov. 171

Choose catalyst objectively.....Nov. 181
What lube oil processes to use.....Dec. 59
Re-refining schemes compared.....Dec. 74
TUBING see **PIPING**
TURBINES
Improve machinery maintenance.....Jan. 85
Optimize your vibration analysis procedures.....Jan. 89
How to improve compressor operation and maintenance.....Jan. 93
Hot alignment too complicated?.....Jan. 99
Why clean turbomachines onstream?....Jan. 102
A new approach to turbomachinery analysis.....Jan. 105
Improve your machinery maintenance tool kits.....Jan. 111
Are couplings the weak link in rotating systems?.....Feb. 97
How to control pump vibration.....Mar. 107
Case histories of specialized turbomachinery problems.....Apr. 141
Outlook for rotating equipment.....May 96
How to select materials for centrifugal compressors.....June 115
Can steam turbines save energy?.....July 109
How to determine allowable steam turbine piping loads.....Aug. 75
All the facts about machinery alignment.....Oct. 139
Monitor machinery condition for safe operation.....Nov. 205
VALVES
Why clean turbomachines onstream?...Jan. 102
Valves for the HPI.....June 87
Why the swing to wafer-type check valves?.....June 93
Valve problems: causes and cures.....June 97
VEHICLES
Exhaust controls use energy.....July 94
Cost to reduce gasoline sulfur.....Oct. 105
VESSELS
Decoke furnace tubes faster.....Apr. 151
Hardenability: key to vessel plate strength.....Apr. 157
Solve more distillation problems (Part 1).....July 148
Answers to important questions about equipment maintenance.....July 159
How to determine the geometry of pressure vessel heads.....Aug. 71
Will existing equipment fail by catastrophic brittle fracture?.....Sept. 217
Solve more distillation problems (Part 2).....Nov. 176
VIBRATION
Optimize your vibration analysis procedures.....Jan. 89
How to improve compressor operation and maintenance.....Jan. 93
A new approach to turbomachinery analysis.....Jan. 105
How to control pump vibration.....Mar. 107
Answers to important questions about equipment maintenance.....July 159
Monitor machinery condition for safe operation.....Nov. 205
VISCOSITY
New charts for viscosity and conductivity data (Part 1).....Jan. 145
New charts for viscosity and conductivity data (Part 2).....Feb. 107
New charts for viscosity and conductivity data (Part 3).....Mar. 115
New charts for viscosity and conductivity data (Part 4).....Apr. 169
Product specs for liquid lubes.....Dec. 67
WASTE DISPOSAL see **ENVIRONMENT**
WAXES
An inside look at China's HPI.....Apr. 105
Refining Handbook.....Sept. 103
What lube oil processes to use.....Dec. 59
